Education

B. Tech, IIT Guwahati | Computer Science and Engineering, Batch of 2020.

Secured AIR-794 General Rank competing 1.2 million candidates.

Interesting Projects

Mad World, <https://multi-agent-debate-nine.vercel.app>

Multi Agent Experimentation Lab, a self-initiated exploration into multi agent discussion rooms.

Built on the hypothesis that single-model chat suffers from sycophancy — models agree with the user — and that putting heterogeneous models in structured disagreement, each grounding claims with independent web search, produces more honest, better-evidenced answers than similar single model alone.

Hommie, <https://thehommie.ai>

Generative UI for model response early before Gemini 3 breakthrough followed by everyone. (deprecated now)

Built an AI chat system featuring dynamic UI generation, an interactive spatial canvas for organizing context, and a built-in presentation layer for showcasing ideas.

Work Experience

Clari, SDE II

March 2021 - February 2026(4 years 11 months) | Promoted from SDE I to SDE II in August 2023

Org Chart

Designed and developed an org chart library module published as a reusable npm package to enable reusable across multiple platforms, including core and acquired products.

Key Features:

1. Graceful Live updates for multiple users to collaborate.
2. Custom Lay-outing algorithm for our internal use cases and features.
3. Stress tested performance for 1000 nodes.

Capture (Entry point of data in Clari)

1. Built from scratch and actively maintained and refined a live dashboard for customers to have visibility into a pipeline entry point previous a black-box to customers.
2. Exposed configuration as a comprehensive UI for customers to have more control on their data.
3. Ideated, proposed and built error signals and resync leading to churn prevention and positive feedback.

Internal Tools

1. Thorough communications with all the teams in the org to know their problems and build tooling around it.
2. Built more than 15 comprehensive tools maintained till date saving 100s of hours of CSM work.
3. Integral part of a fast pace team leding the migration of self maintained tooling to retool.

Founding Member, Engineer | Online 1-1 Tutoring Business, www.shreersctutors.com

Jan 2020 - Feb 2021 (1 Year 1 Month)

1. Product Development: Zero to One Brainstorming on initial feature set, tech stacks, setting up cloud and databases, designs, hiring, support essentially everything needed to set up an online platform based business.
2. Organic Growth Tactics : Designed and rolled out referral, discount and consented video feedback for growth.
3. Support and Miscellaneous : Planned and executed hiring of a small engineering, support and marketing team, driving the platform's growth through continuous improvements and feedback-driven iterations.

Skills

1. Engineering Stack : Node JS, React JS, Next JS, JAVA, AWS, Firebase, Kubernetes, SQS, KAFKA.
2. Product Thinking : Whiteboarding, Zero to One thinking, Ownership, Leading a Team.
3. AI : Agent SDKs, Fundamentals of End to End modern day SOTA Model Training.

Certifications

1. Deep Learning, Andrew Ng Coursera
2. Machine Learning , Andrew Ng Coursera
